

ONE WORKSPACE. YOUR BRAND. YOUR DATA.

The AI assistant that actually knows your business.

Stop stitching together chat, document, slide and research tools. Flowgrid OS gives your team a single workspace where answers cite your own files, each task goes to the most cost-effective AI model, and usage never surprises you.

Who it's for. Small and medium-sized businesses, charities and development trusts with a team of three or more, who already hold their knowledge in reports, policies, funding agreements and spreadsheets, and want an AI assistant that works from those documents, shows its sources and keeps costs predictable. No technical team needed.

Why it matters

- **One bill, one login.** Consolidate chat, vault, research, slides and projects into one workspace.
- **Your name on it.** Your logo, colours and house style are set up from day one, so it feels like your own tool.
- **No single-supplier dependence.** We match each task to the right AI model, so you get top-quality results without paying premium prices for simple jobs.

Built for privacy

- **Your data stays yours.** It is walled off from every other organisation, enforced in the database itself, not just in the software.
- **UK data residency, no training on your files.** Your data is held in the UK, our AI providers do not keep what you send them, and nothing is used to train AI models.
- **UK GDPR and a DPA.** We provide a Data Processing Agreement, and every action in your workspace is logged.

What you get

- ✓ **Branded AI chat**
An assistant that answers from your documents and shows the page it used.
- ✓ **Research mode**
Web search with sources listed, switched on for your workspace if you want it.
- ✓ **Contact book**
Organisations and people, with easy spreadsheet import.
- ✚ **Email & calendar sync · coming**
Gmail and Microsoft 365 triage and drafting.
- ✓ **Cited knowledge vault**
Upload PDF, Word and Excel files and search across them all.
- ✓ **Slide export**
Turn an outline into a PowerPoint deck.
- ✓ **Usage and cost dashboard**
See exactly what your team is using, and what it costs.
- ✚ **Meeting intelligence · coming**
Summaries and action points from your calls.

Built for your sector — optional modules

Switch on the module that matches your work and your workspace gains a structured set of records, plus the reports and documents that are drafted from them. Every figure traces back to your own data. **Ask us for the one-pager on any of these.**

Groundwork **LIVE**

Community-led development projects: stage-by-stage project tracking, funding, budget, risk and planning records, AI-drafted monthly reports, feasibility studies and funding bids.

Grantwork **LIVE**

Grant funding and impact reporting: funder pipeline, award conditions, outcome measures, and monitoring reports drafted from the results you recorded.

Tenderhouse **IN DEVELOPMENT**

Bids and tenders: a library of approved answers you can trace back to evidence, question-by-question drafting and a bid/no-bid scorecard. Design partners wanted.

SIMPLE, PER-SEAT PRICING

Core
