

ONE WORKSPACE. YOUR BRAND. YOUR DATA.

The AI assistant that actually knows your business.

Stop stitching together chat, document, slide and research tools. Flowgrid OS gives every client a single branded workspace where answers cite your own files, tasks route to the cheapest capable AI model, and usage never surprises you.

Why it matters

- **One bill, one login.** Consolidate chat, vault, research, slides and projects into one workspace.
- **Your brand, front and centre.** Logo, accent colour and house tone are baked in from day one.
- **No model lock-in.** Open-weight models are routed by task, so you get frontier quality without the closed-model tax.

Built for privacy

- **Tenant isolation at the database.** Row-level security keeps your data separate from every other client.
- **Zero-data-retention hosts by default.** US/EU infrastructure; nothing trains on your files.
- **Usage caps and audit logs.** Soft caps nudge, hard caps protect; every action is logged.

What you get

- ✓ **Branded AI chat**
Streaming assistant with page-level citations.
- ✓ **Research mode**
Web search with cited sources, gated per tenant.
- ✓ **CRM contact book**
Companies, contacts and CSV import.
- ✚ **Email & calendar sync · on the roadmap**
Gmail and Microsoft 365 triage and drafting.
- ✓ **Cited knowledge vault**
PDF, Word, Excel and Markdown parsed and searchable.
- ✓ **Slide export**
Turn outlines into native PowerPoint decks.
- ✓ **Cost telemetry**
Every AI call metered, visible on your usage page.
- ✚ **Meeting intelligence · on the roadmap**
Bot joins calls; summaries and actions in minutes.

Built for your sector — optional modules

Switch on the module that matches your work and the workspace gains a records spine and the client documents that assemble themselves from it — every figure traceable to your own data. **Ask us for the one-pager on any of these.**

Groundwork LIVE

Community-led development projects: stage-gated spine, funding, budget, risk and planning registers, AI-drafted monthly client reports, feasibility studies and funding bids.

Grantwork LIVE

Grant funding and impact reporting: funder pipeline, award conditions, outcome measures, and monitoring returns drafted from the outcomes you recorded.

Tenderhouse IN DEVELOPMENT

Bids and tenders: an answer library that keeps its claims traceable, question-by-question drafting and a bid/no-bid scorecard. Design partners wanted.
