

RECURRING REVENUE · YOUR BRAND · NO PLATFORM REBUILD

Sell a branded AI workspace without building one.

Flowgrid OS lets agencies, MSPs and consultancies offer a complete AI operations suite under their own label. You own the client relationship; we handle the infrastructure, model routing, security and updates.

Why partner

- **High recurring margins.** ~89% Core, ~88% Pro and ~70% Managed after support labour.
- **Zero licensing overhang.** MIT/Apache stack end-to-end — no surprise commercial fees.
- **Sticky clients.** Vault, projects and usage data increase switching costs.

What your clients see

- **Fully branded workspace** with their logo, accent and domain-ready shell.
- **AI chat with citations** grounded in their documents, not generic web answers.
- **Knowledge vault, research, slides and CRM** in one monthly bill.
